

## Pinnacle DV500 DVD

High Performance Video Editing, Streamlined DVD Creation

### Product Description

DV500 DVD is an affordable real time DV editing and DVD authoring solution featuring high-speed hardware-based encoding and decoding to slash DV production time. DV500 DVD offers real-time image correction, effects, transitions and titles, as well as instant previews. Faster DVD creation is achieved with new Impression DVD SE 2.2 software offering direct output to DVD disks or other media. DV500 DVD retains all of the features of the popular DV500plus, but is even easier to use, with automatic scene detection to Premiere storyboard, new breakout box with integrated FireWire connector, built-in MPEG Multimedia File and no formatting or rendering when mixing analogue and DV footage.

### Key Features

- High Quality, Hardware Accelerated MPEG-2 Output
